**This is the core part of the circuit, Vidjel 94295, located at a 100 km distance from Luleå Kallax Airport. As well as a racetrack it is set up as a center for aircraft technology development. (In the end of the 80s I used the runway and the roads for speed testing related to snowmobile racing/cross. Driving car in this facility may need a circuit reconfiguration) /Torbjörn J (satellite image copyright: hitta.se)**
